ABOUT ME

I am a second-year Data Science student at IIT Madras, passionate about technology and continuous learning. I specialize in frontend development with React.js and Bootstrap and am expanding my backend skills using Flask, MongoDB, and other tools to become a full-stack developer. With intermediate proficiency in Python and a beginner's grasp of Java, I am also learning DSA to strengthen my problem-solving abilities. Additionally, I explore data analytics, machine learning, and UI/UX design, creating intuitive interfaces with Figma. My dedication and creative edge drive me to deliver impactful and innovative solutions. I enjoy expressing ideas and taking on leadership roles. My hobbies include art, writing, and semiclassical dance, which fuel my creativity and bring a unique perspective to my work.

PROJECTS

HOUSEHOLD SERVICES APP

- Designed and implemented a household services app using Flask, Python, and Bootstrap.
- Features include user and service professional management, admin dashboard, and service request tracking.

AMAZON CLONE

- Developed a visually appealing clone of Amazon's UI with a focus on responsiveness and user-friendly design.

PARALLAX SCROLLING WEBSITES

- Built multiple interactive parallax scrolling websites showcasing advanced CSS and JavaScript animations.

UI/UX DESIGNS

- Created wireframes and prototypes for various projects using Figma, focusing on intuitive user flows and modern design aesthetics.

EXPERIENCE & ACHIEVEMENTS

- **Core, Central Event Management Department:**
  Leading the team responsible for organizing large-scale events at IIT Madras. Gained expertise in planning, logistics, and team coordination.

- **Super Coordinator, Sponsorship Department:**
  Successfully secured sponsorship deals with big brands for college fests. Enhanced skills in negotiation, networking, and stakeholder management.

- **Volunteer, CODE HR Summit:**
  Assisted in organizing an HR summit, interacting with HR professionals from top companies, and learning industry insights.
